Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, 7, 9, and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Ernest.

The patent by Ernest (4,175,503) shows a cylinder block for an internal combustion engine. Also shown is at least one cylinder bore (66), a top deck (58), a coolant jacket (10a, 10b), and first and second longitudinally opposed end walls (Fig. 7). Each of the first and second end walls have a substantially planar end wall surface arranged on respective first and second planes.

The coolant jacket includes a first portion located between the first end wall and the at least one cylinder bore, and a second portion located between the second end wall and the at least one cylinder bore.

At least one of the first and second end walls includes a projecting portion adjacent the top deck which projects longitudinally beyond the first or second planes (Fig. 8).

Each of the first and second end walls includes a projecting portion adjacent the top deck which projects longitudinally beyond the respective first or second plane.

Art Unit: 3747

First and second coolant jacket portions (Fig. 8) are located at least partially within the projecting portions.

Each of the first and second coolant jacket portions are co-planar with the first and second planes, respectively (Fig. 8).

The at least one cylinder bore is a linerless cylinder bore.

The block comprises at least two cylinder bores, the bores having conjoined cylinder walls (Fig. 8).

The projecting portions are curved projections.

Allowable Subject Matter

Claims 3, 5, 8, 10-14, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on flex.
